

Algebra Classroom Supplies

2024-2025

Students must bring the following supplies to every class session:

- Pencil
- Separate Eraser
- Red Pen
- Graphing Composition Book
- Straight Edge
- Graphing Calculator
- Textbook Cover (book is 10¼" tall x 9¼" wide x 1½" thick)

Graphing Composition Book: Either 4×4 or 5×5 graph paper is acceptable. The pages will remain in the journal, so tear-out pages are strongly discouraged. A standard composition book style is recommended. Students will need approximately 3-4 composition books to last the year.

Straight Edge: Any straight edge is fine. It does not need to have measurements. Six inches is long enough. Cheap plastic (i.e., protractors) is not recommended because it usually breaks during the 1st trimester.

Graphing Calculator: Acceptable graphing calculator models are TI-83 and TI-84. They are both issued in several editions (i.e., Plus, Silver Edition, Color Edition), but any edition will work. If you already have a TI-83 it will work fine. If buying a new one, TI-84 models are recommended. TI-84 Plus CE is the newest model.

Organizer: Optionally, it can help to have a case for calculator and supplies. For example:
